Index to *Cartography and Geographic Information Science*, Volume 27

Authors

Bunch, Rick, and Robert Lloyd. 2000. The search for boundaries on maps: Color processing and map pattern effects. 27(1): 15-30.

Buttenfield, Barbara P., see Michael Leitner.

Cheng, Yang, and Jean J. Lorre. 2000. Equal area map projection for irregularly shaped objects. 27(2): 91-100.

Chirié, François. 2000. Automated name placement with high cartographic quality: City street maps. 27(2): 101-110.

Clarke, Keith C., and John G. Cloud. 2000. On the origins of analytical cartography. 27(3): 195-204.

Cloud, John G., see Keith C. Clarke.

Franklin, Wm Randolph. 2000. Applications of analytical cartography. 27(3): 225-238.

Gong, Jianhua, Hui Lin, and Xiaolu Yin. 2000. Three-dimensional reconstruction of the Yaolin Cave. 27(1): 31-40.

Griffin, Amy L., see Mark Harrower.

Harrower, Mark, Alan MacEachren, and Amy L. Griffin. 2000. Developing a geographic visualization tool to support earth science learning. 27(4): 279-293.

Harwell, Matthew C., see David J. Wilcox.

Hodler, Thomas, see Xiaojun Yang.

Højholt, Peter. 2000. Solving space conflicts in map generalization: Using a finite element method. 27(1): 65-74.

Kelly, Nina M. 2000. Spatial accuracy assessment of wetland permit data. 27(2): 117-128.

Kessler, Fritz C. 2000. A visual basic algorithm for the Winkel Tripel projection. 27(2): 177-183.

Kilpeläinen, Tiina. 2000. Knowledge acquisition for generalization rules. 27(1): 41-50.

De Man, W.H. Erik. 2000. Institutionalization of geographic information technologies: Unifying concept? 27(2): 139-152.

Leitner, Michael, and Barbara P. Buttenfield. 2000. Guidelines for the display of attribute certainty. 27(1): 3-14.

Li, Bin. 2000. A component perspective on geographic information services. 27(1): 75-86.

Lin, Hui, see Jianhua Gong.

Lloyd, Robert, see Rick Bunch.

Lorre, Jean J., see Yang Cheng.

MacEachren, Alan, see Mark Harrower.

Maddock, Tara, see Paul Robbins.

McAllister, Michael, and Jack Snoeyink. 2000. Medial axis generalization of river networks. 27(2): 129-138.

Moellering, Harold. 2000. The scope and conceptual content of analytical cartography. 27(3): 205-224.

Nelson, Elisabeth S. 2000. Designing effective bivariate symbols: The influence of perceptual grouping processes. 27(4): 261-277.

Orth, Robert J., see David J. Wilcox.

Robbins, Paul, and Tara Maddock. 2000. Interrogating land cover categories: Metaphor and method in remote sensing. 27(4): 295-309.

Saalfeld, Alan. 2000. Complexity and intractability: Limitations to implementation in analytical cartography. 27(3): 239-250.

Sadahiro, Yukio. 2000. Perception of spatial dispersion in point distributions. 27(1): 51-64.

Snoeyink, Jack, see Michael McAllister.

Theobald, David M. 2000. Reducing linear and perimeter measurement errors in raster-based data. 27(2): 111-116.

Tobler, Waldo R. 2000. The development of analytical cartography: A personal note. 27(3): 189-194.

Wilcox, David J., Matthew C. Harwell, and Robert J. Orth. 2000. Modeling dynamic polygon objects in space and time: A new graph-based technique. 27(2): 153-164.

Yang, Xiaojun, and Thomas Hodler. 2000. Visual and statistical comparisons of surface modeling techniques. 27(2): 165-176.

Yin, Xiaolu, see Jianhua Gong.

Articles

A component perspective on geographic information services. Li, Bin. 2000. 27(1): 75-86.

A visual basic algorithm for the Winkel Tripel projection. Kessler, Fritz C. 2000. 27(2): 177-183.

Applications of analytical cartography. Franklin, Wm Randolph. 2000. 27(3): 225-238.

Automated name placement with high cartographic quality: City street maps. Chirié, François. 2000. 27(2): 101-110.

Complexity and intractability: Limitations to implementation in analytical cartography. Saalfeld, Alan. 2000. 27(3): 239-250.

Designing effective bivariate symbols: The influence of perceptual grouping processes. Nelson, Elisabeth S. 2000. 27(4): 261-277.

Developing a geographic visualization tool to support earth science learning. Harrower, Mark, Alan MacEachren, and Amy L. Griffin. 2000. 27(4): 279-293.

Equal area map projection for irregularly shaped objects. Cheng, Yang, and Jean J. Lorre. 2000. 27(2): 91-100.

Guidelines for the display of attribute certainty. Leitner, Michael, and Barbara P. Buttenfield. 2000. 27(1): 3-14.

Institutionalization of geographic information technologies: Unifying concept? De Man, W.H. Erik. 2000. 27(2): 139-152.

Interrogating land cover categories: Metaphor and method in remote sensing. Robbins, Paul, and Tara Maddock. 2000. 27(4): 295-309.

Knowledge acquisition for generalization rules. Kilpeläinen, Tiina. 2000. 27(1): 41-50.

Medial axis generalization of river networks. McAllister, Michael, and Jack Snoeyink. 2000. 27(2): 129-138.

Modeling dynamic polygon objects in space and time: A new graph-based technique. Wilcox, David J., Matthew C. Harwell, and Robert J. Orth. 2000. 27(2): 153-164.

On the origins of analytical cartography. Clarke, Keith C., and John G. Cloud. 2000. 27(3): 195-204.

Perception of spatial dispersion in point distributions. Sadahiro, Yukio. 2000. 27(1): 51-64.

Reducing linear and perimeter measurement errors in raster-based data. Theobald, David M. 2000. 27(2): 111-116.

Solving space conflicts in map generalization: Using a finite element method. Højholt, Peter. 2000. 27(1): 65-74.

Spatial accuracy assessment of wetland permit data. Kelly, Nina, M. 2000. 27(2): 117-128.

The development of analytical cartography: A personal note. Tobler, Waldo R. 2000. 27(3): 189-194.

The scope and conceptual content of analytical cartography. Moellering, Harold. 2000. 27(3): 205-224.

The search for boundaries on maps: Color processing and map pattern effects. Bunch, Rick, and Robert Lloyd. 2000. 27(1): 15-30.

Three-dimensional reconstruction of the Yaolin Cave. Gong, Jianhua, Hui Lin, and Xiaolu Yin. 2000. 27(1): 31-40.

Visual and statistical comparisons of surface modeling techniques. Yang, Xiaojun, and Thomas Hodler. 2000. 27(2): 165-176.
